Education

University of Waterloo Sep 2023 - Aug 2027
Bachelor's degree, Computer Science, Finance, and Statistics *Waterloo, ON, Canada*

Skills

Product:	Requirements gathering, stakeholder feedback, feature demos, prioritization, user research
Analytics & Tools:	SQL, Excel, Power BI, Figma, Jira, Confluence
Technical:	Python, Rust, TypeScript, C#, REST APIs, SQL, Azure, AWS, GitHub Actions
Digital Assets:	BTCUSDT market data, Binance testnet, exchange and risk-control infrastructure

Experience

Manulife Financial Corporation Toronto, ON, Canada
Software Engineer *May 2026 – Aug 2026*

- Partnered with Canadian segment and internal technical teams to clarify requirements, demo ServiceNow workflows, incorporate feedback, and secure sign-off; automation for **1K+ daily cross-system operations** eliminated the manual exception queue.
- Translated access-control and auditability requirements into a **GitHub App token exchange**, adding team-scoped validation and least-privilege permissions across catalog automations.
- Added AKS cluster and certificate checks, enabling a **Foundry LLM agent to compare GitOps PRs with live cluster state** and flag deployment misconfigurations before production.

Treasury Board Secretariat Toronto, ON, Canada
Software Developer *Sep 2025 – Dec 2025*

- Gathered QA-team and executive feedback for a test-framework project; clarified requirements, demoed features, and secured sign-off to migrate **30 Selenium tests across five suites** to Katalon, simplifying no-code onboarding.
- Built job-title normalization for a **5K-firm dataset**, cutting the administrative backlog **85%** and enabling peer-group governance reporting.
- Improved analyst-facing report load time **30%** by rebuilding stored procedures, adding indexes, and removing cursors.

Guangdong Tiptop Asset Management Co., Ltd. Guangdong, China
Analyst *Jan 2025 – Apr 2025*

- Prioritized a weekly shortlist from **500+ BSE-listed equities** using earnings quality, moat durability, and capital intensity to focus portfolio-manager research.
- Built Audiowell's three-statement and DCF models (**¥3.5B market cap**); scenario analysis supported the post-listing sell-down of a **¥15M** pre-IPO position at **5–6×**, with a **¥30M+** stake retained.

Lansi Institute of Artificial Intelligence in Medicine Remote
Data Analyst *May 2024 – Dec 2024*

- Built a parallelized genomic ETL pipeline for **100GB of multi-omics data**, cutting preprocessing **89%, from days to hours**.

Sanyang Technology Co., Ltd. Guangdong, China
Software Engineer *Jun 2024 – Nov 2024*

- Worked daily with a business analyst to translate requirements and UX demos into a **.NET reconciliation module** and REST API data pipeline, automating month-end checks and powering real-time sales dashboards for business users.

Projects

Legos | BTCUSDT Trading Infrastructure

- Built a modular Rust trading pipeline connecting market-data feeds, order-book processing, market-making strategy, hard-limit risk checks, and exchange gateways; configured historical replay and Binance testnet integrations.
- Benchmarked **10M ticks at 70 ns p99 in-process latency** (excluding network I/O); workspace includes **88 tests** across the trading pipeline.

Achievements

- As UX Research Hub Director, responded to member requests for more industry-speaker events; secured a Google UXR researcher as a guest speaker, drawing **50 attendees** and attracting **50 new members**. Grew membership **32× (10⟶318)** and managed event funding with the executive team.
- Velocity Co-op Problem Award (top submission among co-op cohort); 3rd Place, SAF Investment Research Challenge; Finalist, SAF Strategy Case Competition, Moonshot Hackathon Winner
