Jian Feng

To: Hiring Manager

As a third-year Computer Science, Finance, and Statistics co-op student at the University of Waterloo, I am writing to express my strong interest in the Student, FCC Finance & Treasury Opportunities program at Fidelity Clearing Canada (FCC), with a particular focus on the Student, FCC Fund Treasury & Trading track. My background building quantitative factor models and complex 3-statement/DCF valuations as an Analyst at Guangdong Tiptop Asset Management directly provides me with the advanced Excel and financial modeling capabilities required to accurately compile trading reports, track portfolio performance, and forecast interest revenue. Furthermore, my extensive experience in data engineering—such as optimizing high-throughput data pipelines and automated workflows at the Treasury Board Secretariat—uniquely satisfies your team's preference for Python and SQL programming while proving my ability to identify and implement critical process automation improvements. Having successfully managed institutional risk and compliance during my software co-op at Manulife, I possess the meticulous attention to detail and analytical accuracy necessary to safely oversee credit limits, calculate daily liquidity needs, and manage high-stakes workflows within a regulated brokerage framework. I am excited to bring this powerful intersection of programming fluency and financial acumen to FCC's rapidly expanding clearing and custody business.
Sincerely,
Jian Feng
