Education

University of Waterloo Sep 2023 - Aug 2027
Bachelor's degree, Computer Science, Finance, and Statistics *Waterloo, ON, Canada*

Skills

Languages:	Python, C/C++, Java, Go, SQL
ML:	PyTorch, TensorFlow, Hugging Face, scikit-learn, XGBoost, OpenCV, pandas
LLM & Agents:	LangChain, LangGraph, Google ADK
Data & Cloud:	PostgreSQL, MongoDB, Redis, AWS, Azure, GCP, Docker, Kubernetes

Experience

Manulife Financial Corporation Toronto, ON, Canada
Software Engineer *May 2026 – Aug 2026*

- Built reusable ServiceNow workflows supporting thousands of internal developers and **1K+ daily cross-system operations**; pre-validation and skip-on-failure handling removed manual exception processing.
- Migrated the ServiceNow orchestrator from basic auth to **GitHub App token exchange** with PyGithub; added mfc-ets team validation, automated permission scopes, and end-to-end audit trails for catalog automations.
- Integrated live kubectl commands and AKS cluster checks into the GOCC orchestrator for cert-SAN verification; enabled the Foundry LLM agent to compare **GitOps PRs with live cluster state** and catch deployment misconfigurations.

Treasury Board Secretariat Toronto, ON, Canada
Software Developer *Sep 2025 – Dec 2025*

- Built a .NET MVC module to normalize job titles across **5K public firms**, reducing administrative backlog by 85% and enabling peer-group and governance reporting.
- Migrated **30 Selenium cases across five suites** to Katalon on Azure DevOps CI/CD; demoed to execs and adopted by other QA teams to ease no-code onboarding.
- Refactored core modules of the enterprise data platform and tuned SQL, cutting 5K-firm-facing browser page load **30%** for faster reviews.

Lansi Institute of Artificial Intelligence in Medicine Remote
Data Analyst *May 2024 – Dec 2024*

- Built genomic ETL pipelines for 100GB of multi-omics data; per-sample Python `multiprocessing` cut runtime **89%**, from days to hours.
- Ran XGBoost + SMR/MR² across a **68-study T2D meta-analysis** for researchers; narrowed the candidate drug-target shortlist used in published papers.

Sanyang Technology Co., Ltd. Guangdong, China
Software Engineer *Jun 2024 – Nov 2024*

- Built a **Gantt visualizer** for a flexible job-shop scheduling system, enabling daily, benchmark-based A/B comparisons of scheduling algorithms.
- Shipped **Spring Boot CRUD APIs** for cloud reporting/BI modules, unblocking front-end dashboards and downstream ETL consumers.

Projects

ArmyOfSafeguards

- Built a text-safety system with **four parallel DeBERTa experts** for toxicity, sexual content, jailbreaks, and factuality; experts can be swapped through configuration.
- Trained a logistic meta-aggregator that **outperformed threshold baselines** on held-out Hugging Face data; automated feature generation so new experts require no fusion-code changes.

PantryPilot | Python, FastAPI

- Built a pantry tracker with FastAPI and MongoDB Atlas; **Gemini extracts grocery items and OCRs receipts** to update food-waste metrics.
- Developed a Google ADK meal-planning agent that **prioritizes near-expiry ingredients**, integrating MongoDB and Bright Data MCP tools through an HTMX interface.

Achievements

- **Moonshot Hackathon Winner**; Velocity Co-op Problem Award (top submission in cohort).
- Grew UX Research Hub **32× (10⟶318 members)** as Director.

Coursework

Stanford Machine Learning, UCI Mathematics for ML, UA Reinforcement Learning
