Jian Feng

To: Hiring Manager

I am writing to express my interest in finance-related opportunities where I can contribute analytical rigor, business judgment, and technical execution. My background combines finance, data analysis, and operational problem-solving, and I am particularly interested in roles that value clear thinking, structured decision-making, and practical impact.

Through academic, internship, and project experience, I have built a foundation in financial analysis, reporting, research, and data-driven decision support. I am comfortable working with spreadsheets, business intelligence tools, SQL, and Python to organize information, identify insights, and communicate findings clearly to stakeholders.

I am most effective in environments that require ownership, attention to detail, and adaptability. Whether supporting financial planning, valuation, operations, or broader business analysis, I bring a disciplined approach to learning quickly, improving processes, and delivering reliable work in both independent and collaborative settings.

I would welcome the opportunity to discuss how my experience and skill set can support your team. Thank you for your time and consideration.

Sincerely,
Jian Feng
